

**WIMM-BILL-DANN FOODS OJSC
DELIVERS VOLUME GROWTH AND SHARE GAINS IN Q1 2010**

Moscow, Russia – June 03, 2010 – Wimm-Bill-Dann Foods OJSC [NYSE: WBD] today announced its financial results for the first quarter ended March 31, 2010.

HIGHLIGHTS FOR THE FIRST QUARTER 2010

- Group revenue increased 19.1% year-on-year to US\$615.3 million driven by solid volume growth across all segments and helped by a stronger ruble
- Group gross profit increased 2.3% year-on-year to US\$172.0 million
- Group gross margin declined to 28.0% from 32.5% compared to prior year as a result of sharp increases in raw milk costs in the first quarter of 2010
- Group net income almost tripled to US\$33.7 million from US\$12.6 million a year ago
- Net income as a percentage of sales increased to 5.5% in the first quarter of 2010 from 2.4% in the same period last year
- EBITDA¹ increased to US\$73.5 million compared to US\$73.1 million in the first quarter last year

“Wimm-Bill-Dann achieved a solid start to 2010 with strong sales growth driven by volume improvements across dairy, beverages, and baby food,” said Tony Maher, Wimm-Bill-Dann’s Chief Executive Officer. “We are not just benefiting from demand recovery, we are gaining market share in all three segments outperforming the market. As we indicated earlier, the disruption in the supply of raw milk we saw in the fourth quarter of last year continued into the first quarter, impacting our profitability in the dairy segment in the short-term, but the fundamentals of this market are solid nonetheless.”

“Group revenue in the first quarter of 2010 increased 19.1% versus the same period a year ago to US\$615.3 million, driven by volume growth across dairy, beverages, and baby food and a favourable exchange rate. Group revenue in rubles increased 4.9% in the first quarter of 2010 versus the same period a year ago.”

“The first quarter was a good start to the year as our strategy of focusing on generating profitable growth coupled with sound financial discipline is paying dividends,” Tony Maher concluded.

The average selling price increased 12.0% to US\$1.18 per 1 kg in the first quarter of 2010 from US\$1.06 per 1 kg in the first quarter of 2009. Our raw milk purchasing price increased 34.3% year-on-year in US dollar terms in the first quarter of 2010. Attachment A
Reconciliation of EBITDA and EBITDA margin to US GAAP Net Income

EBITDA is a non-U.S. GAAP financial measure. The following table presents reconciliation of EBITDA to net income (and EBITDA margin to net income as a percentage of sales), the most directly comparable U.S. GAAP financial measure.

	<u>3 months ended</u>		<u>3 months ended</u>	
	<u>March 31, 2010</u>		<u>March 31, 2009</u>	
	US\$ 'mln	% of sales	US\$ 'mln	% of sales
Net income	33.7	5.5%	12.6	2.4%
Add: Depreciation and amortization.....	26.1	4.2%	22.7	4.4%
Add: Income tax expense.....	11.5	1.9%	4.0	0.8%
Add: Interest expense.....	7.9	1.3%	9.6	1.8%
Less: Interest income.....	(1.1)	(0.2%)	(2.4)	(0.5)%
Less: Currency remeasurement loss (gain), net.....	(5.3)	(0.9%)	25.1	4.9%
Add: Bank charges.....	0.5	0.1%	1.0	0.2%
Add: Minority interest	0.2	0.04%	0.03	0.0%
Add: Other.....	-	-	0.5	0.1%
EBITDA.....	73.5	11.9%	73.1	14.1%

EBITDA represents net income before interest, income taxes and depreciation and amortization, adjusted for interest income, currency remeasurement gains, bank charges and other financial expenses and minority interest. EBITDA margin is EBITDA expressed as a percentage of sales.

We present EBITDA because we consider it an important supplemental measure of our operating performance. In particular, we believe EBITDA provides useful information to securities analysts, investors and other interested parties because it is used in the “debt to EBITDA” debt incurrence financial measurement in certain of our financing arrangements.

EBITDA has limitations as an analytical tool, and you should not consider it in isolation, or as substitute for analysis of our operating results as reported under U.S. GAAP. Moreover, other companies in our industry may calculate EBITDA differently or may use it for different purposes than we do, limiting its usefulness as a comparative measure.

EBITDA also should not be considered as an alternative to cash flow from operating activities or as a measure of our liquidity. In particular, EBITDA should not be considered as a measure of discretionary cash available to us to invest in the growth of our business.
